

**REMARKS**

This paper provides for inserting a reference in the Substitute Specification to the International Application from which it claims priority.

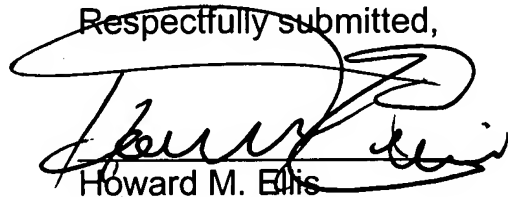

Minor corrections have been made to the Abstract.

The claims have been amended to conform more with US claim drafting practices.

No prohibited new matter is introduced into the application. The amended claims find support in the original text and drawings of the International Application and German priority application.

March 29, 2005

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Howard M. Ellis", is written over a horizontal line.

Howard M. Ellis
